

Preparation of COVID-19 vaccine Janssen®

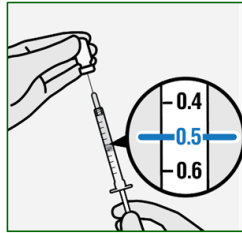

Frozen vaccine should be thawed before use as described

Swirl the vial gently

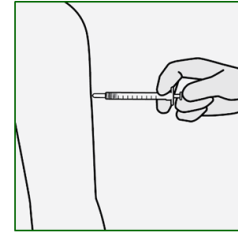

- Before administering a dose of vaccine, swirl the vial gently **in an upright position for 10 seconds.**

Do not shake.

Withdraw 0.5 mL

Use a sterile needle and sterile syringe to extract a single-dose of **0.5 mL** from the multi-dose vial

Inject 0.5 mL

Administer by **intramuscular injection only** into the deltoid muscle of the upper arm

Open vaccine vials should be discarded after 6 hours

A maximum of 5 doses can be withdrawn from the multi-dose vial. Discard any remaining vaccine in the vial after 5 doses have been extracted
